

EUR Customer Portal V2 (EUR release .26)

BLUE - Only for EUR | **GREY** - is also being requested in NAM page

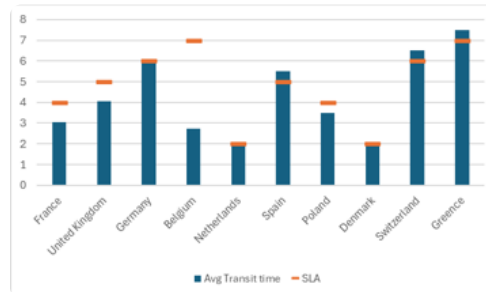

- Add Ability to update the password - self service
- Ability to associate more than one client to an account - example user@pentland.com can access, both Pentland, Mitre, Endura and Berghaus through a single login, via dropdown, similar to the Admin view.
- Ability to see a consolidated view of all sub account data into a main client account.
 - For example: G-Star Raw is the main account, but has multiple entities in Europe that are managed and invoiced separately. So G-Star Raw UK and G-Star Raw NL have their own account set up, but would need to be consolidated into one main account for governance.

1) Dashboard

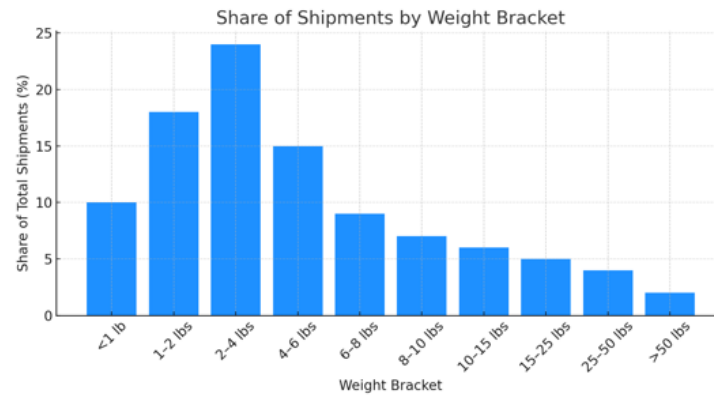

1. Ability to open the list of parcels in transit by clicking over the “in transit” volume OR a filter in the report with “delivered” and “in transit”
2. Performance visual - based on SLA - Added without SLA
 - a. Similar to Average Transit time” per country graph but a line with expected SLA
 - b. Example:

3. Percentage of on-time delivery
 - a. Using Selected carrier and service
 - b. Include dropdown for destination country
 - c. Classify parcels by “On-time”: delivered within SLA or “Late”: delivered after SLA.
 - d. Consider only parcels with “Delivered” scan and calculate based on first “customer a-scan” and first “customer stop clock” scan
 - e.

4. Volume distribution by weight (declared weight)
 - a. Parcel with any scan (used label)
 - b. Add a filter with requested service
 - c. Aggregate weight in 10 ranges:
 - i. 0-1kg, 1-2kg, 2-3kg, 3-5kg, 5-7kg, 7-10kg, 10-12kg, 12-15kg, 15-20kg, 20kg +.
 - d. Bar chart with percentage of volume (number of parcels) for each weight bracket

6. Average daily volume - weekly view - latest 8 weeks. Expand to see more weeks.

a. Only show up to previous week (full week)

b. Show data label

1. Input several tracking numbers or order numbers at a time in the search bar (ideally just copy and paste different lines, or, separated by comma)

2. Add billable weight - TBC where this is stored

3. Add total amount billed at parcel level (only after billed)

- a. sum of base rate, fuel, and any other surcharge
4. Add “Label to A-scan - Calendar days” column calculating the whole days, in calendar days, between the label created date and the first start the clock event in milestone.
5. Add a “Shipment Status” column showing the latest “maersk tracking status group”. If blank from GTS, show the previous status available
6. “Performance” - stating “Late”/ “on-time”, based on transit time being: above: Late; equal or below expected SLA: On-time
7. “SLA” - SLA for each specific parcel - see excel [EUR Delivery SLAs.xlsx](#)
8. When exporting, the file name must contain date and hour of the download (customer time)

2.1) Report filters

The screenshot shows a web application for tracking Maersk shipments. On the left is a sidebar with various filter categories, each with a dropdown menu set to 'All'. On the right is a large table displaying a list of shipments with their details.

Filters:

- Carrier: All
- Carrier Service: All
- Maersk Service: All
- Origin Country: All
- Destination Country: All
- Ship From: All
- Ship To: All
- Shipment Type: All
- Induction Hub: All
- A-scan Date: [01/07/2025] [15/07/2025]
- Delivery Date: [01/07/2025] [15/07/2025]

Table Columns: Order Number, Carrier, Carrier Service, Maersk Service, Shipment Type, Induction Hub, Label Print Date (UTC), Parcel A Scan Date (Local Time), Stop (Local Time)
