

## Manual labels page for Customer Portal V2

- Ensure internal users (warehouse staff) can also access the customer profile and create labels
- Ability to clearly identified the manual labels in reports and internal pages

### 5) Manual Label creation page

- Allow Customers to create manual labels, for any service available for that specific customer, including outbound, returns, special VAS etc
- EUR - Parity to legacy portal where this feature is already available

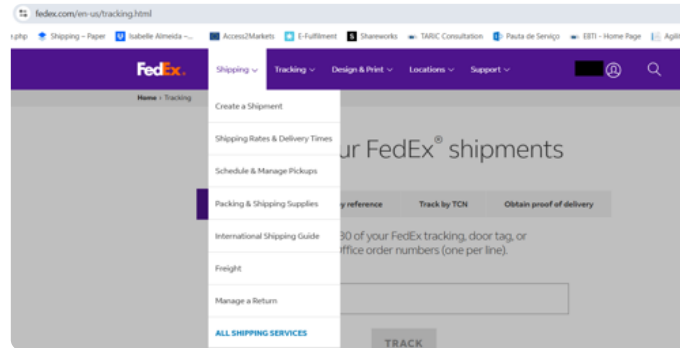

Number of manual labels created by ops team YTD. These requests are typically from CX and the warehouse teams depending on the need. They include both outbound and return labels.

NAM: Main reason is for a return, when a client needs to return product that was delivered. From time to time we will have to create labels for warehouses if they have an urgent shipment that needs to go out and they are running into an error message or an IT issue with the order dropping in their system.
