

NAM Customer Portal V2 (NAM release .26)

BLUE - Only for NAM | GREY - is also being requested in EUR page

- Add Ability to identify and filter out non- MEC parcels (Customers is using their own accounts.)
- Add Ability to update the password - self service
- Ability to associate more than one client to an account - example user@pentland.com can access, both Pentland, Mitre, Endura and Berghaus through a single login, via dropdown, similar to the Admin view.

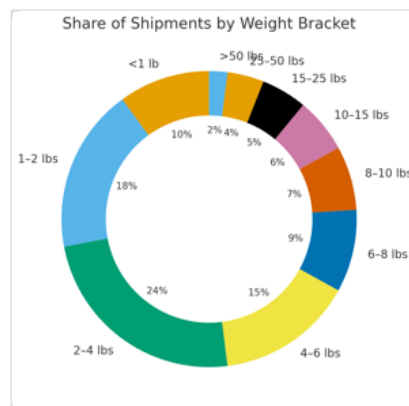

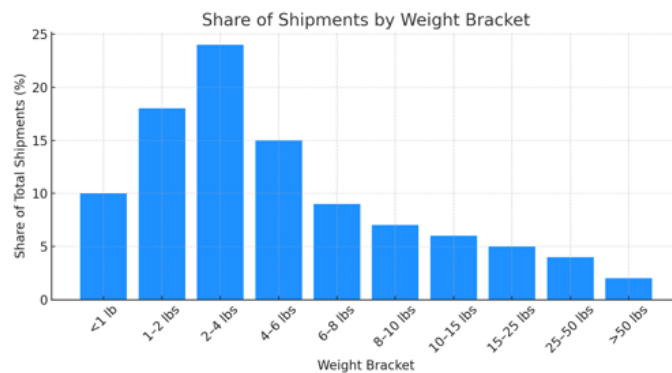

1) Dashboard

1. Add filter for "Carrier" - requested carrier - Done
2. Add filter for "Shipment type" to list outbound or return -Done
3. Average Transit Time: Top 10 Carrier & Service based on volume. - WIP
 - a. Change TT calculation to Business Days - as per attached rules

4. Average Transit Time per zone: Change TT calculation to Business Days - as per attached rules - WIP
5. Replace the harmonization done to the carrier and service name which remove “_” and repeated carrier names by the sharepoint table already used for EUR - Done
6. Ability to open the list of parcels in transit by clicking over the “in transit” volume OR a filter in the report with “delivered” and “in transit” - Done
7. Add Graph for Volume distribution by weight (declared weight) -Done
 - a. Parcel with any scan (used label)
 - b. Aggregate weight in ranges: <1lb, 1 to 2lbs, 2 to 4lbs, 4 - 6lbs, 6-8lbs, 8-10lbs, 10-15lbs, 15-25lbs, 25- 50lbs, >50lbs.
 - c. Bar chart with percentage of volume (number of parcels) for each weight bracket

4. Add Graph with “On time deliveries” chart
 - a. Using Requested carrier and service
 - b. Classify parcels by “On-time”: delivered within SLA or “Late”: delivered after SLA. On-time: transit time TT_bus5_local, or TT_bus6_local as per each carrier rule, is equal or less that SLA. Late is greater than SLA.
 - c. Consider only parcels with “Delivered” scan and calculate based on first “customer a-scan” and first “customer stop clock” scan

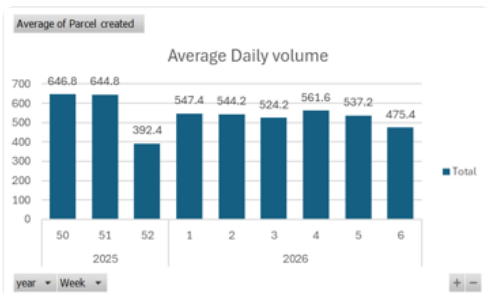

d. example (at service level)

5. Average daily volume - weekly view - latest 8 weeks. Expand to see more weeks. - Done

a. Only show up to previous week (full week)

b. Show data label

 3. when exporting, the file name must contain date and hour of the download (customer time) - *not possible_its not out of box feature in PBI*

2.1) Report filters

The screenshot shows a report interface with a sidebar of filters on the left and a data table on the right. The filters include Carrier (AS), Service (AS), Zone (AS), Origin Warehouse (AS), Ship From (AS), Ship To (AS), Order Number (AS), Ship Date (02/06/2025 to 19/06/2025), and Delivery Date (04/06/2025 to 19/06/2025). The data table has columns: Order Number, Label Print Date, Parcel A Scan Date, Delivery Date, Ship From, Ship To, Zone, Origin Warehouse, Transit Time (days), and Carrier. The table contains 30 rows of data.

Order Number	Label Print Date	Parcel A Scan Date	Delivery Date	Ship From	Ship To	Zone	Origin Warehouse	Transit Time (days)	Carrier
